

# DATA ON KUBERNETES COMMUNITY

## About Us

The Data on Kubernetes Community is where users go to run data on Kubernetes (DoK). We facilitate the creation and sharing of best practices to help users advance in their DoK journey through our forum, events, and working groups.

We are a vendor-neutral, independent community of end users seeking best practices and solutions for running stateful and data applications on Kubernetes. We deliver a range of community programs designed to grow and support the burgeoning space.

## Community Programs

- ✔ DoK Special Interest Group
- ✔ Industry Reports
- ✔ Community Ambassadors

### Virtual Meetups

Monthly Town Hall meetups where we feature real world use cases.

### Slack Community

A place for DoK practitioners to collaborate and share knowledge.

### YouTube Channel

We have hundreds of videos on a wide range of DoK related topics.
